Application Security / DevSecOps Coordinator | Business Development Manager | CDP

Computer Engineer and Information Security - Master level educated, with more than 3 years of experience in designing and developing sSDLC/DevSecOps. Experienced in Application Security processes with a broad skill set that can be applied across different industries. To be progressive and innovative by developing solutions to complex problems to meet high business expectations.

Innovative, committed to continuously improving skills and processes. Enthusiastic, resilient, self-driven, adaptable, collaborative.

Professional Proficiency in English.

Specialties. Application Security, sSDLC, DevSecOps, Vulnerability Management and Orchestration etc.

Technologies. SAST, SCA, DAST, IaC, SSCS, CI/CD, ALM

EDUCATION

Master of Science (M.Sc.) in Information Security, Hacettepe University, Ankara, 2023
Bachelor of Science (BS) in Computer Engineering, Izmir Institute of Technology, İzmir, 2020
Bachelor Degree of International Relations, Anadolu University, Eskişehir, 2020

PROFESSIONAL EXPERIENCE

Endpoint Cyber Sec. R&D Co., Ankara **Jan 2021 - Present**
Application Security / DevSecOps Coordinator **Mar 2022 - Present**

- **AppSec Coordinator:** As AppSec Coordinator, I coordinate application security within the company. I use high technologies such as DevSecOps, vulnerability management, static and dynamic analysis, API security, and application security orchestration and correlation tools to better serve customers and develop new customer production products. I also collaborate with internal teams on application security issues, setting security standards and ensuring application security policies are implemented. My experience includes reducing vulnerabilities in many projects by more than 30% through DevSecOps and secure coding practices.
- **DevSecOps Architect:** As a DevSecOps Architect, I specialize in the design and management of the company's DevSecOps processes. I manage the secure software development lifecycle (sSDLC) processes and ensure that these processes are implemented in accordance with the company's needs. I also have experience in areas such as security testing, vulnerability management, automated security testing and application security operation. I create DevSecOps strategies, assess the company's security requirements and collaborate across teams to ensure a secure software development environment. My experience includes automating more than 80% of the vulnerability processes in many projects through DevSecOps best practices.

- **Technology Communications Specialist:** I work on behalf of the company as a Technology Communications Specialist, strategically communicating with senior executives such as Vice Presidents, Directors, and Chief Technology Officers to introduce new technologies and their potential benefits to companies. I also set appointments with sales-ready decision makers using communication channels such as high-level conference calls, GoToMeetings, and in-person meetings.

Application Security Engineer

Jan 2021 – Mar 20222

- Led static code analysis and open-source analysis on several large-scale mobile and web applications, uncovering critical and high severity potential vulnerabilities and collaborating with developers to fix them before deployment.
- Contributed to a 80% improvement in the company's internal security maturity rating through process improvements and tool implementation.
- Threat Modeling was performed for a company that develops multiple applications in an industry that can be considered critical, and identified and mitigated potential attack vectors before the services went live.
- Reduced assessment time by 77% per project by automating vulnerability scans and subsequent reporting and remediation processes
- Increased developer awareness of security best practices by 40% through training workshops and code analysis.
